離散數學 第一次期中考

2020/10/14

注意事項:

1. 禁止使用計算機、翻譯機、禁止攜帶計算紙；**手機請關機**。
2. **計算與證明題需要計算過程方予計分**。
3. 當然不可以作弊。
4. 請於答案卷左上角填上題號以方便閱卷。
5. 使用兩張答案卷的同學記得兩張都要寫名字，並將之合併在一起交回。
6. 請努力作答。

一、簡答題 (35%)

1. (1-3 no.8) How many ways can a gambler draw five cards from a standard deck and get
   (a) A flush (five cards of the same suit)? $\binom{4}{1}\binom{13}{5}$ (2%)
   (b) A full house (three of a kind and a pair)? $\binom{13}{2}\binom{4}{3}\binom{4}{2} \times 2$ (2%)
   (c) Two pairs? $\binom{13}{2}\binom{4}{2}\binom{4}{2}\binom{11}{1}\binom{4}{1}$ (2%)

2. (1-3 no.27) Determine the sum of all the coefficients in the expansions of
   (a) $(x+y)^{10} = 2^{10}$ (2%)
   (b) $(2s-3t+5u+3v-10w+3x+2y)^{10} = 2^{10} = 1024$ (3%)

3. (2-1 no.4) Let p, q, r, s denote the following statements:
   p: I finish writing my computer program before lunch.
   q: I shall play tennis in the afternoon.
   r: The sun is shining.
   s: The humidity is low.
   Write the following in symbolic form.
   (a) If the sun is shining, I shall play tennis this afternoon. $r \to q$ (2%)
   (b) Finishing the writing of my computer program before lunch is necessary for my playing tennis this afternoon. q $p \vee q$ $p \vee (p \to q)$ (2%)
   (c) Low humidity and sunshine are sufficient for me to play tennis this afternoon. (2%)
   $[(s \wedge r) \to q]$

4. (2-1 no.11a) How many rows are needed for the truth table of the compound statement $(p \vee \neg q) \leftrightarrow [(\neg r \wedge s) \to t]$, where p, q, r, s, and t are primitive statements? 2^5 (2%)

5. (2-4 no.3) Let $p(x)$ be the open statement "$x^2 = 3x$," where the universe comprises all integers. Determine whether each of the following statements is true or false.
   (a) $p(-3)$ false (2%)
   (b) $\exists x\, p(x)$ true (2%)

6. (2-4 no.6) let $p(x, y)$, $q(x, y)$ denote the following open statements.

$p(x,y)$: $x^2 \geq y$ $\quad$ $q(x, y)$: $x + 2 < y$

If the universe for each of x, y consists of all real numbers, determine the truth value for each of the following statements.

(a) $p(-3, 8) \wedge q(1, 3)$ (2%)

(b) $p(1/2, 1/3) \vee \neg q(1, 2)$ (2%)

(c) $p(2, 2) \rightarrow q(1, 1)$ (2%)

7. (2-4 no.25) Let the universe for the variables in the following statements consist of all real numbers. In each case negate and simplify the given statement.

(a) $\forall x \, \forall y \, [(x < y) \nrightarrow \exists z \, (x < z < y)]$ (3%)

(b) $\forall x \, \forall y \, [(|x| = |y|) \nrightarrow (y = \pm x)]$ (3%)

二、計算與證明，須有計算過程或說明方予計分 (65%)

8. (1-1 no.3) Buick automobiles come in five models, 10 colors, three engine size, and two transmission types. (a) how many distinct Buicks can be manufactured? (3%)
(b) If one of the available colors is blue, how many different blue Buicks can be manufactured? (2%)

9. (1-1 no.21) (a) How many arrangements are there of all the letters in SOCIOLOGICAL? (2%)
(b) In how many arrangements in part (a) are all the vowels adjacent? (3%)

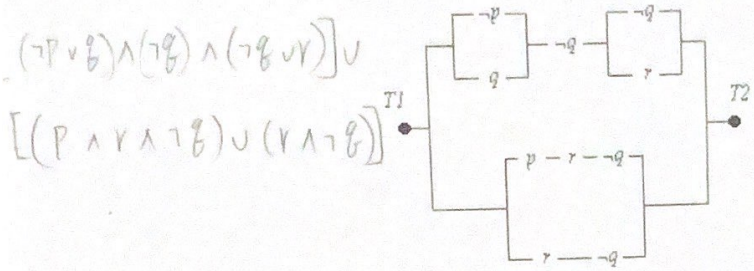
10. (1-1 no.37) Sixteen people are to be seated at two circular tables, one of which seats 10 while the other seats six. How many different seating arrangements are possible? (5%)

11. (1-4 no.9) Columba has two dozen each of n different colored beads. If she can select 21 beads (with repetitions of colors allowed) in 65,780 ways, what is the value of n? (5%)

12. (1-4 no.13) In how many ways can we distribute eight identical white balls into four distinct containers so that
(a) No container is left empty? (2%)
(b) The fourth container has an odd number of balls in it? (3%)

13. (Chap 1 no. 18) (a) Determine the number of nonnegative integer solutions to the pair of equations $x_1 + x_2 + x_3 = 6$, $x_1 + x_2 + x_3 + x_4 + x_5 = 15$, $x_i \geq 0$, $1 \leq i \leq 5$? (5%)
(b) Answer part (a) with the pair of equations replaced by the pair of inequalities
$x_1 + x_2 + x_3 \leq 6$, $x_1 + x_2 + x_3 + x_4 + x_5 \leq 15$, $x_i \geq 0$, $1 \leq i \leq 5$? (5%)

14. (2-2 EX.2.18) Simplify the network shown below: (10%)



15. (2-3 EX.2.33, no.11) The following argument is validity or invalidity? Prove it or provide a counterexample.

(a) (10%)

$$\frac{p \wedge \neg q \qquad p \rightarrow (q \rightarrow r)}{\therefore \neg r}$$

(b) (10%)

$$\frac{u \rightarrow r \qquad (r \wedge s) \rightarrow (p \vee t) \qquad q \rightarrow (u \wedge s) \qquad \neg t}{\therefore q \rightarrow p}$$
